HEX[®]

COMPARISON CHART

HEX[®]
ORIGINAL

- Lightweight hexagon cells that conform and flex to support the body

HEX[®]
ELITE KNIT

- Knitted construction is breathable and extra soft

HEX[®]
FORCE

- High-abrasion construction is more durable

HEX[®]
HIGH IMPACT

- Absorbs energy on impact, reducing impact force to the body
- The highest level of HEX[®] protection.

HEX® FORCE LEG SLEEVE / PAIR MD21160 / MD21180 (Y)

HEX® Force is on another level—more durable, high-abrasion construction maximizes protection on impact when you're diving on the court for loose balls.

- Anatomically graduated 9mm HEX® contours around knee.
- Compression maintains muscle warmth and prevents abrasions and scratches.
- Impact protection.
- hDc® Moisture Management.

SIZES: S-XL (Adult); OSFM (Youth)
MSRP: \$49.99 (Adult); \$44.99 (Youth)
COLORS: Black, White

HEX® SKIN - ROLL MD6650

Lets you apply HEX® almost anywhere you need for advanced, custom protection.

- Best for body-to-body contact and body-to-surface contact
- Engineered to help protect the body from impact, burn, and abrasion
- Simply cut to length and apply direct to skin

Warning: Don't apply tape directly to an open wound. If skin area with pad turns an unnatural color and hurts, it's too tight — loosen it.

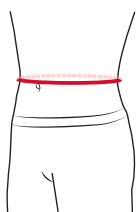

SIZES: N/A

MSRP: \$19.99

COLORS: Black

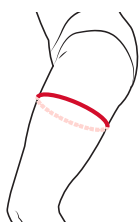

MEASURE TRUE

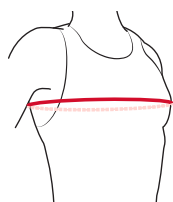

WAIST

Stand with stomach relaxed (c'mon, you're among friends here). Measure the minimum circumference (skinniest part) in the waist area. Tape should be parallel with the floor.

THIGH

Stand and measure the maximum circumference (meatiest part) of your upper leg near the crotch.

CHEST

Stand and measure around the fullest part of your chest. Tape should be parallel with the floor. (No superhero chest puffing).

KNEE

Measure the knee to be protected (you likely figured that). Stand and bend your leg just less than 45 degrees, measure around the largest part of knee, directly over the patella (kneecap).

KNEE

Stand and bend your leg just less than 45 degrees, measure knee circumference 2" (5cm) below the center or patella (kneecap).

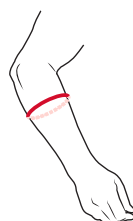

ELBOW

Bend your elbow to approximately 45 degrees and measure directly over the joint. When ordering a pair, take measurements of both elbows and use the average of the results.

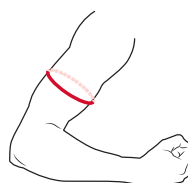

WRIST

Keeping wrist straight, measure directly over joint, including wrist bones.

FOREARM

With your arm slightly flexed, measure the fullest part of your forearm, typically midway between your wrist and elbow.

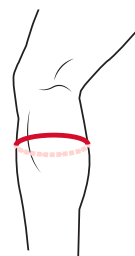

BICEP

With your arm slightly flexed (remember, "slightly"), measure the fullest part of upper arm/bicep. When ordering a pair, take measurements of both arms and use the average of the results.

FOOT

Measure circumference at center of arch directly over top of instep.

CALF

Stand and measure the calf in question (you knew this). Measure at the fullest part of the calf. When ordering a pair, take measurements of both calves and use the average of the results.

ANKLE

Stand and measure ankle circumference 1"/25cm above center of inner ankle bone tip (the knobby bits). If you measure while seated, flex your foot slightly back toward yourself as you measure.
