SHOCK
DOCTOR™

2023

WE NEVER

Being the #1 Mouthguard in the World isn't enough. Protection has never looked so good. We listen to the hungriest, swaggiest, most committed athletes in the game and make products to help them look great, feel even better and perform out of their minds. You know what time it is. The Shock Doctor army is growing fast – get in or get left in the dust.

SHOCK DOCTOR

ULTRA CUP RETENTION SYSTEM

Compression technology in our cup shorts adds another element of muscle-enhancing performance to your game. The facts are compression increases blood flow and increased blood flow is a very good and athletic thing.

An advanced system consisting of a close fitting ergonomic pocket and flexible four-way stretch Y internal strap attachment that secures the lower two-thirds of the bio-shaped cup pocket in a more natural position, allowing the short to move independently from the cup for superior comfort.

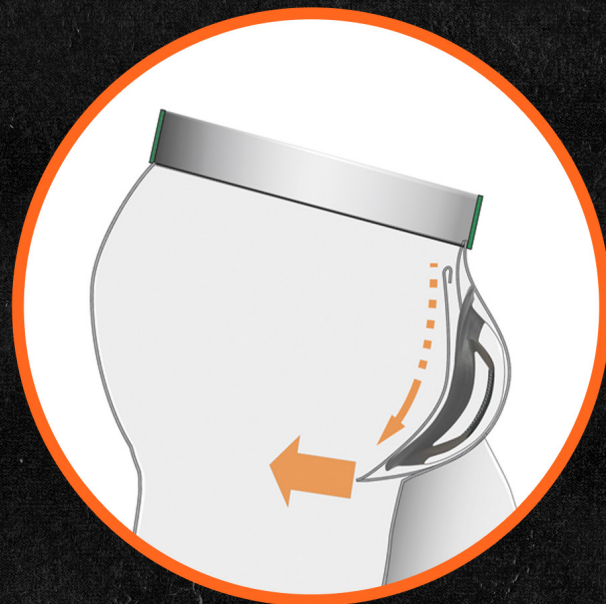

Shorts are constructed of four-way stretch fabric that wicks moisture, plus chafe-free flatlock seams, a premium micro-knit waistband and vented mesh cup pocket.

AIRCORE
+
ULTRA^{PRO}

CORE FLEX POCKET

We don't mess around with your personal core protection. All of our cups are made of the most reliable and resilient materials possible. The best cups (aka, Shock Doctor Core Protection Cups) are built to be forgotten about, until you remember why you chose Shock Doctor.

Core exceeds the standards for athletes requiring enhanced performance and comfort. Refined flex pocket design positions the lower third of the bio-shaped cup pocket in a more natural position for a closer more comfortable fit.

CORETM

AIRCORE CUP SD30690

The AirCore™ Athletic Cup is combined of patented 3-layer fusion technology. The outer most layers consist of a compressed foam and fabric shell offering the highest level of comfort. The inner core is a composite co-polymer material for protection.

LIGHTWEIGHT - 30% lighter than traditional cups, allows your best speed and athletic performance

PROTECTION - Rigid co-polymer core keeps you protected while you play

ULTIMATE COMFORT - Extremely comfortable, Best-in-Class cup comfort

WAIST TRIMMER 835

Helps core support and can help enhance weight loss efforts with proper exercise and diet. Our Waist Trimmer provides protection and helps reduce the incidence of injury. The trimmer cushions, compresses, and supports lower back and ab muscles during exercise and outdoor use.

PROMOTES WEIGHT LOSS - The therapeutic heat technology in our Waist Trimmer is designed to wrap your entire mid-section and preserve body heat to remove excess water weight

SUPPORT YOUR CORE - A strong core stabilizes your entire body. The Shock Doctor Waist Trimmer helps build a strong core that offers better balance, stimulates circulation and improves posture. Increased blood flow, muscle stability and rapid recovery all focused on your core

ENHANCE PERFORMANCE - Compression makes major muscles warm and happy, reducing fatigue and cramping. Compression also decreases loss of energy from excessive motion and vibration during exercise

PREVENT INJURIES - Our Waist Trimmer provides protection and helps reduce the incidence of injury. Cushions, compresses, and supports lower back and ab muscles during exercise and outdoor use. Also ideal for everyday support

COMFORTABLE AND LIGHT WEIGHT - Made using the highest quality and most innovative technology and materials

LATEX-FREE - Neoprene construction for thermal/compression therapy and soft tissue support. Non-slip neoprene inner layer maintains positioning to prevent slipping during your workout

RELIEVES MUSCLE SORENESS - Retains therapeutic heat to relieve sore muscles and arthritis. Speeds your return to activity and enhances performance

COMPRESSION ARM SLEEVES

SIZE:	XS	S	M	L
Forearm circumference: (just below elbow)	6.5-8" / 17-20cm	8-9.5" / 20-24cm	9.5-11" / 24-28cm	11-13" / 28-33cm

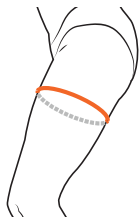

MEASURE TRUE

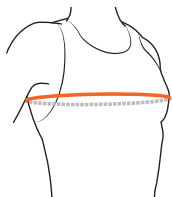

WAIST

Stand with stomach relaxed (c'mon, you're among friends here). Measure the minimum circumference (skinniest part) in the waist area. Tape should be parallel with the floor.

THIGH

Stand and measure the maximum circumference (meatiest part) of your upper leg near the crotch.

CHEST

Stand and measure around the fullest part of your chest. Tape should be parallel with the floor. (No superhero chest puffing).

KNEE

Measure the knee to be protected (you likely figured that). Stand and bend your leg just less than 45 degrees, measure around the largest part of knee, directly over the patella (kneecap).

KNEE

Stand and bend your leg just less than 45 degrees, measure knee circumference 2" (5cm) below the center of patella (kneecap).

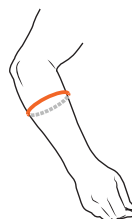

ELBOW

Bend your elbow to approximately 45 degrees and measure directly over the joint. When ordering a pair, take measurements of both elbows and use the average of the results.

WRIST

Keeping wrist straight, measure directly over joint, including wrist bones.

FOREARM

With your arm slightly flexed, measure the fullest part of your forearm, typically midway between your wrist and elbow.

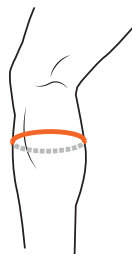

BICEP

With your arm slightly flexed (remember, "slightly"), measure the fullest part of upper arm/bicep. When ordering a pair, take measurements of both arms and use the average of the results.

FOOT

Measure circumference at center of arch directly over top of instep.

CALF

Stand and measure the calf in question (you knew this). Measure at the fullest part of the calf. When ordering a pair, take measurements of both calves and use the average of the results.

ANKLE

Stand and measure ankle circumference 1"/25cm above center of inner ankle bone tip (the knobby bits). If you measure while seated, flex your foot slightly back toward yourself as you measure.

WHEN ORDERING

Numerical suffix must be used with denoted size when ordering (i.e. XS-31)
